

Write a Python Selenium Testing Script to do the following tasks:

1. Go to the website: <https://rahulshettyacademy.com/client>
2. Create an account manually (do not automate account creation, do not use code/script here).

Use:

- a. Password: Ab#12345
 - b. Email: your_student_id@gmail.com (Ex: 0112230001@gmail.com)
 - c. Phone number: 1234567890
3. Click the Forgot Password option.
 4. Enter your registered email address.
 5. Read and print the heading/title text of the Forgot Password page.
 6. Return to the Login page.
 7. Login using your registered email address and password.
 8. Go to the TechSmartHire page by clicking the blinking green link

Use the time library to introduce delays to give time for your components to load
